3" Meter	\$30,723.00	\$ 340.00	\$2,200.00

- **Fire Protection Service**

Where private fire protection service connections are made to GIWA's system, GIWA shall have the right to approve the plans for such installation prior to approval of the application for service. GIWA or their authorized representative shall make any connection to the distribution system that is required, and the member shall pay to GIWA the actual cost for making such connection.

GIWA shall have the right to require a compound-type meter for installation in the private fire line if deemed necessary. Waiver of the requirement for installation of a separate meter at the time the connection is made shall not prohibit GIWA from requiring a meter installation at a future date if such installation is warranted in the opinion of GIWA. Any meter required will be supplied and installed by GIWA, with the cost of the meter, together with labor and materials for installation, to be borne by the member.

No other connection for domestic, commercial or industrial use shall be made to any fire service
